Duration	5 mins 1 sec
Grade	**15.00** out of 15.00 (**100**%)

Question **1**

Correct

Mark 1.00 out of 1.00

What is the best-case time complexity of linear search?

a. O(log n)
b. O(n log n)
c. O(1) ✓
d. O👎

Question **2**

Correct

Mark 1.00 out of 1.00

Which of the following is a limitation of binary search?

a. It does not work with negative numbers
b. It requires the list to be sorted ✓
c. It can only be applied to large lists
d. It is slower than linear search for small lists

Question **3**

Correct

Mark 1.00 out of 1.00

Which of the following is a type of searching method?

a. Quick search
b. Merge search
c. Linear search ✓
d. Bubble search

Question **4**

Correct

Mark 1.00 out of 1.00

_____sort is the simplest sorting algorithm that works by repeatedly swapping the adjacent elements in case they are unordered in n-1 passes.

a. Insertion

b. Complexity

c. Bubble ✓

d. Selection

Question **5**

Correct

Mark 1.00 out of 1.00

The average case occurs in the linear search algorithm

a. When the item is not the array at all

b. When the item is somewhere in the middle of the array ✓

c. Item is the last element in the array or item is not there at all

d. When the item is the last element in the array

Question **6**

Correct

Mark 1.00 out of 1.00

During a linear search, what is the maximum number of comparisons needed to find an element in a list of size n?

a. n/2

b. n ✓

c. log n

d. n-1

Question **7**

Correct

Mark 1.00 out of 1.00

What is the time complexity of linear search in the worst case?

a. O(1)
b. O(log n)
c. O(n log n)
d. O👎 ✓

Question **8**

Correct

Mark 1.00 out of 1.00

Which of the following scenarios is best suited for applying binary search?

a. When the list is sorted ✓
b. When the list is unsorted
c. When the list is very small
d. When the list contains duplicate elements

Question **9**

Correct

Mark 1.00 out of 1.00

What type of search would be most appropriate for finding an element in a list that is frequently updated?

a. Hash search
b. Linear search ✓
c. Binary search
d. Interpolation search

Question **10**

Correct

Mark 1.00 out of 1.00

In binary search, what happens if the middle element does not match the target element?

a. The list is sorted
b. The search continues in the left or right sublist ✓
c. The search continues from the beginning
d. The search stops

Question **11**

Correct

Mark 1.00 out of 1.00

_____ search takes a sorted/ordered list and divides it in the middle.

a. Binary ✓

b. Hash

c. Linear

d. Both (1) & (3)

Question **12**

Correct

Mark 1.00 out of 1.00

What happens when the element is found in linear search?

a. The search backtracks to find duplicate elements

b. The search continues until the end of the list

c. The search starts over from the beginning

d. The search stops immediately ✓

Question **13**

Correct

Mark 1.00 out of 1.00

Which method of searching involves sequentially comparing each element until a match is found?

a. Linear search ✓

b. Binary search

c. Jump search

d. Hashing

Question **14**

Correct

Mark 1.00 out of 1.00

What is the key characteristic of binary search?

a. It compares elements sequentially

b. It works on unsorted lists

c. It can be applied only if the list is sorted ✓

d. It always starts from the beginning of the list

Question **15**

Correct

Mark 1.00 out of 1.00

What is the advantage of binary search over linear search?

- a. Binary search has a lower time complexity on large, sorted lists ✓
- b. Binary search does not require dividing the list
- c. Binary search works on unsorted lists
- d. Binary search can find multiple instances of the target element
